

Carbon dioxide sensor

Industrial Scientific has announced the availability of a carbon dioxide (CO₂) sensor for its Radius BZ1 Area Monitor.

The Radius BZ1 can detect up to seven gases simultaneously and now has 18 sensor options, making it suitable for a wide variety of applications.

With the addition of the CO₂ sensor, Radius BZ1 can be used in food and beverage, commercial cultivation facilities, and any other application that requires CO₂ monitoring. The new sensor offers a measurement range of 0-5% with a resolution of 0.01% volume.

To download the product bulletin, go to Industrial Scientific's website: indsci.com.

Incident investigation

RRC now offers the NEBOSH HSE Introduction to Incident Investigation course.

The course is designed to enable learners to be able to carry out solo accident investigations, produce risk control plans and contribute to team accident/incident investigations for large-scale investigations. The aim is to aid individuals in positively impacting the safety culture in their organisations.

This will be a one-day course, plus an assessment in which learners will analyse a case study. The course is available as an in-company course worldwide, with online and classroom courses coming soon at RRC's London venue.

Safety light grid

Schmersal Group has launched a safety light grid with a built-in Bluetooth interface.

The SLC440/COM with Bluetooth BLE is an active optoelectronic protective device that makes all status and diagnostic data on the operating status of the device available on smartphones or tablets via a Bluetooth interface on a real-time basis.

The Bluetooth interface supports easy start-up using a smartphone or tablet with the integrated setup aid. There is the option to save data which can then be used, for example, to document a repeat test or for predictive maintenance purposes.

The transmission of data to smartphones / tablets (Android, IOS) is facilitated by an app developed by

Schmersal. BLE stands for Bluetooth Low Energy, a radio system for near-field data transmission with secure transmission.

Eye protection

Bollé Safety's patented 160° Flex Technology ensures its SILEX safety glasses comfortably fit every size and shape of face.

The design, which is said to give absolute support without any pressure points, allows the wearer to be secure all day long.

Available in clear and a smoke outdoor version, the safety glasses come with colourful bi-material thin sports temples and permanent

double-sided anti-fog and anti-scratch lens coating. They meet the highest European standard EN166/170 1FT.

The SILEX provides the wearer with a 180° panoramic visual field with optical class 1 quality due to Bollé Safety's polycarbonate lens design technology. Additionally, SILEX can be combined with a retainer strap for a better grip and dust protection.

Pockets galore

Engel's 'X-Treme' collection includes slim-fit, stretchable work-trousers designed to boost comfort especially for those doing any form of floor work.

In 65% polyester and 35% cotton, the trousers, feature a smooth, inner-

croch seam panel and patches of stretchable, ventilated material at the backs of the knees and seat areas to help keep the wearer cool and boost flexibility. There are two spacious slanted pockets at the front, two back pockets and a phone pocket with flap on the right thigh; a standard pocket on the left has an extra inner, zipped compartment.

Other features include a ruler pocket with extra sections for tools, tool straps and Velcro-fastened, knee-reinforced pockets with two knee pad positions. An extra deep hem allows trouser length to be increased.

Optional clip-on hanging tool pockets are available.

Ready for summer

Designed for summer, **Snickers'** new Topwear uses 37.5° fabric technology, which wicks moisture away from the body to keep the wearer dry.

The range includes shirts, hoodies and sweatshirts in various styles and colours that are said to be super-light and quick-drying and which have advanced ventilation to ensure the wearer stays cool in the heat.

The garments feature body-mapping designs for a good fit, functionality and long-lasting comfort.

Platform for tank showers

A new GRP ladder platform for emergency tank showers has been introduced by **Hughes Safety Showers** to enable easy and safe access to the tank.

The platform can be attached to all new tank shower orders or retrofitted to existing Hughes tank showers, with the option to mount at the left, right or rear of the shower, depending on requirements.

At 1215mm high, the railing on the platform exceeds the HSE recommended 950mm for working platforms, as well as the 1100mm stipulated in Building Regulations for guard rails.

Manufactured in hi-visibility yellow GRP, the platform features slip-resistance steps and a caged ladder area to keep workers safe during inspection and maintenance processes.
